DETAILED ACTION

1. The response of 7/15/2005 was received and considered.
2. Claims 2, 4, 11 & 13 are pending.

Response to Arguments

3. Applicant's arguments with respect to claims 2, 4, 11 & 13 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2, 4, 11 & 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 2 & 11, it is unclear how the ticket can be a "permissions ticket" if the servers to which the ticket directs the client are unconditional.

Regarding claims 2 & 11, it is unclear how the servers can be "unconditional" as this word modifies an action or action-based noun. *For the purposes of this Office Action, the limitation "wherein the content servers are unconditional" is understood to mean "wherein access to the content servers are unconditional".*

Claim Rejections - 35 USC § 102

Art Unit: 2134

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 2 & 11 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,774,660 to Brendel et al. (**Brendel**). Brendel discloses a plurality of content servers/server farm each of which stores the same content (col. 2, lines 53-67) and a reception server/balancer having a first device configured to select one of the content servers based on load conditions thereof (col. 6, lines 20-58), a second device/balancer configured to receive a first access request relating to the order/request from the client (col. 6, lines 43-46), and a third device/balancer configured to issue a permission ticket/HTTP redirect message to the client (col. 21, lines 2-7), wherein the content servers/server farm are unconditional and transmit the content to the client in response to a second access request (reissued request) from the client using the permission ticket/HTTP redirect message (col. 21, lines 2-7), wherein the permission ticket/HTTP redirect message locates said selected one of content servers on the network (col. 21, lines 2-7).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2134

9. Claims 4 & 13 are rejected under 35 U.S.C. 103(a) as being obvious over **Brendel**, as applied to claims 2 & 11 above, in further view of U.S. Patent 6,799,214 to **Li**. Brendel lacks specifying a time period to control an access using the permission ticket from the client. However, Li teaches that content mirroring sites should assign expiration times to mirrored content to ensure the content does not permanently occupy memory and to provide fixed time periods during each day (col. 12, line 66 – col. 13, line 8). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Brendel to specify a time period/expiration to control an access using the permission ticket from the client. One of ordinary skill in the art would have been motivated to perform such a modification to ensure the content does not permanently occupy memory and to provide fixed time periods during each day, as taught by Li (col. 12, line 66 – col. 13, line 8).

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2134

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
